# “NOW THAT YOU KNOW” STDS and CONDOMS

February 2011

Edited by: Lori Jordahl MBA-HA

## National Condom Week & Valentines Day

FEBRUARY IS  
NATIONAL CONDOM MONTH

USE A  
CONDOM  
EVERYTIME

IT'S ABOUT  
RESPECT  
AND  
RESPONSIBILITY  
FOR YOURSELF AND  
YOUR PARTNER

Latex condoms help protect you both against sexually transmitted infections (STIs). Visit [www.ASHAstid.org](http://www.ASHAstid.org) for more information about condom use and ways to reduce your risk.

Many people have no signs or symptoms of STDs and/or they may not recognize them. Untreated STDs can lead to serious health problems. Syphilis, like many other STDs, facilitates the spread of HIV.

You can protect yourself, your health and your partners health by using a condom every time. Plan ahead, talk with your partner. Remember condoms don't protect against some STDs. Get the facts and other ways to protect yourself!

NOW THAT YOU KNOW,  
WHAT WILL YOU DO?

If you love each other,  
protect yourselves from HIV and STDs!  
Show your love this Valentine's Day  
Get tested, Get treated, and Love  
Carefully!

Love
