

## Attention all HIV/ AIDS Researchers!!!

The Miami Dade HIV/ AIDS Partnership, which serves as the Mayor's planning council for HIV/ AIDS services in Miami-Dade County, is recruiting researchers to present their scientific findings to the community and members of the Partnership at their monthly meetings.

The Committee's primary goals are to:

- Provide researchers with opportunities to share results of findings or HIV intervention strategies with the community;
- Integrate findings into HIV/ AIDS planning and priority-setting activities;
- Link researchers with providers or PLWHAs when new research or clinical trial opportunities are available;
- Assist researchers in developing new research or clinical trials.
